Shore & Beach

VOLUME 93 • NO. 4 ■ FALL 2025
Journal of the American Shore
& Beach Preservation Association

— A DEDICATED ISSUE —

Cobbles

Shoreline typology of the United States

Multi-year morphological changes at two adjacent high-energy composite beaches in France

Cobbles: Coastal storytellers, adaptation engineers, and unlikely heroes

Surfers Point: Lessons from a cobble beach pilot on a dynamic delta

Physical model studies and design guidelines for a new type of composite dynamic revetment

Disciplinare base

Shore & Beach 2641-7286

Pubblicata per la prima volta nell'ottobre del 1933, Shore & Beach è una rivista trimestrale sottoposta a peer review dell' **American Shore and Beach Preservation Association (ASBPA)**. La rivista pubblica articoli sui litorali costieri e in tutto il mondo. I contenuti hanno carattere scientifico, economico, sociale e politico

First published in October 1933, Shore & Beach is a peer-reviewed quarterly journal of the American Shore and Beach Preservation Association (ASBPA). The journal publishes articles on coastal and coastal areas around the world. Its content covers scientific, economic, social and political topics.

Journal of Foraminiferal Research

VOLUME 55, NUMBER 1

JANUARY 2025

2024 Joseph A. Cushman Award: Professor Jan W. Pawłowski, Department of Genetics and Evolution, University of Geneva, Switzerland, and Institute of Oceanology of the Polish Academy of Sciences, Sopot	Andrew J. Gooday, Samuel S. Bowser, Susan T. Goldstein, and Maria Holzmänn	1
Who is who in the foraminiferal world: Taxonomic revision of selected <i>Cibicidoides</i> and <i>Planulina</i> species in recent southeast Pacific marine sediments	Sebastián Garrido, Magali Schweizer, Dharma Reyes-Macaya, María Yolanda Núñez, Alexis Castillo Bruna, and Babette A. A. Hoogakker	4
Description and ecology of the new foraminiferal species <i>Elphidium balticum</i> – with a genetic and morphological comparison to <i>Elphidium incertum</i> (Williamson, 1858) and <i>Elphidium asklundi</i> Brotzen, 1943	Karen Luise Knudsen, Magali Schweizer, Marit-Solveig Seidenkrantz, and Christof Pearce	29
<i>Ammonia</i> (foraminifera) in Long Island Sound (USA): Molecular and morphological diversity	Eleanor J. Goetz, Allison Yan, Pincelli M. Hull, and Ellen Thomas	45
An integrated approach to environmental health assessment of a coral reef ecosystem based upon foraminifera	Catia Fernandes Barbosa, Daniel François do Nascimento Silva, Anna Clara Freitas Bellot, Pamela Hallock, Silvia Lisboa de Araujo, Renata Carolina Mikosz Arantes, and José Carlos Sicoli Seoane	60
Micropaleontological evidence of a submarine fan in the lower Coaledo Formation, southwestern Oregon, USA: Discussion	Joanne Bourgeois, Marjorie A. Chan, John M. Armentrout, and Kenneth J. Bird	78
Micropaleontological evidence of a submarine fan in the lower Coaledo Formation, southwestern Oregon, USA: Reply	Kristin McDougall	87
In Memory of Ivan de Klasz, PHD (1926–2024)	Eduardo A. M. Koutsoukos	95
In Memory of Emile A. Pessagno, JR., B.A., M.S., PH.D. (1933–2024)	Pamela Buzas-Stephens	97
In Memory of Betty Skipp, PHD (1928–2023), USGS Field Geologist, Stratigrapher, and Micropaleontologist	Paul Brenckle and Jean LaDue	98
Announcements		100

OA

Journal of Foraminiferal Research 0096-1191

Da quest'anno Open Access. La rivista "**Journal for Foraminiferal Research**" è la continuazione dei "Contributions from the Cushman Laboratory for Foraminiferal Research" (1925-1950) e dei "Contributions from the Cushman Foundation for Foraminiferal Research" (1950-1970). La rivista accoglie articoli originali di interesse internazionale riguardanti i Foraminiferi, un gruppo di organismi unicellulari eucarioti a guscio biomineralizzato che ha un ruolo primario per la datazione dei corpi sedimentari, e gruppi di organismi affini.

Open Access from this year. The **Journal for Foraminiferal Research** is the successor to the publications "Contributions from the Cushman Laboratory for Foraminiferal Research" (1925–1950) and "Contributions from the Cushman Foundation for Foraminiferal Research" (1950–1970). The journal welcomes original articles of international interest regarding Foraminifera, a group of unicellular eukaryotic organisms with biomineralized shells that play a key role in dating sedimentary bodies, and groups of related organisms.

Reviews in
Medicinal
Chemistry*

Rivista specialistica

Current Medicinal Chemistry 0929-8673

Current Medicinal Chemistry è una rivista internazionale, sottoposta a peer review, pubblicata da Bentham Science Publishers e dedicata alla chimica farmaceutica. Include articoli sulle relazioni quantitative struttura-funzione, sull'assorbimento e distribuzione dei farmaci, sul metabolismo dei farmaci, sui nuovi bersagli farmacologici, sulla farmacogenomica, tossicologia della scoperta di farmaci, screening ad alto rendimento, chimica combinatoria, sintesi organica di composti naturali, sulle tecniche chimiche e analitiche utilizzate nella progettazione razionale dei farmaci. Ogni numero include una serie di mini-recensioni approfondite e puntuali e numeri tematici curati da esperti del settore, che coprono una vasta gamma di argomenti di attualità nella chimica farmaceutica. La rivista pubblica anche recensioni di brevetti recenti.

Current Medicinal Chemistry is an international, peer-reviewed journal dedicated to medicinal chemistry, published by Bentham Science Publishers. It includes articles on quantitative structure-function relationships, drug absorption and distribution, drug metabolism, novel drug targets, pharmacogenomics, toxicology of drug discovery, high-throughput screening, combinatorial chemistry, organic synthesis of natural compounds, and chemical and analytical techniques used in rational drug design. Each issue includes a series of in-depth, timely mini-reviews and thematic issues edited by experts in the field, covering a wide range of current topics in medicinal chemistry. The journal also publishes reviews of recent patents.
