RSC Advances 2046-2069

RSC Advances è una delle più grandi riviste scientifiche ad accesso aperto nel campo delle scienze chimiche. Veicola ricerche di qualità nel campo della chimica condivise in tutto il mondo.

RSC Advances is one of the largest open-access scientific journals in the field of chemical sciences. It publishes high-quality research in the field of chemistry, which is shared worldwide.

Journal of Geodesy 1432-1394

Journal of Geodesy è una rivista internazionale dedicata allo studio dei problemi scientifici della geodesia e delle scienze interdisciplinari correlate. Pubblica articoli sottoposti a peer-review riguardanti studi teorici o di modellizzazione, nonché risultati di esperimenti e interpretazioni. La rivista copre l'intero spettro della scienza geodetica, studi teorici e applicati.

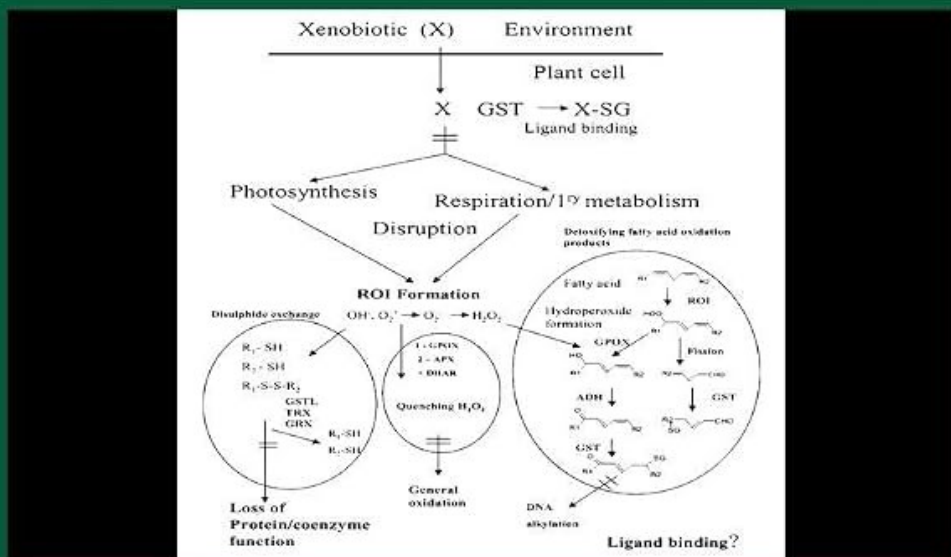

The **Journal of Geodesy** is an international journal dedicated to the study of scientific problems in geodesy and related interdisciplinary sciences. It publishes peer-reviewed articles on theoretical and modelling studies, as well as experimental results and interpretations. The journal covers the entire spectrum of geodetic science, including both theoretical and applied studies.

INCORPORATING ADVANCES IN PLANT PATHOLOGY

Volume 42

Series Editor J.A. CALLOW

[Advanced in botanical research 2162-5948](#)

La collana **Advances in Botanical Research (ABR)**, che comprende l'ex *Advances in Plant Pathology* nasce nel 1963. La collana raccoglie contributi dedicati alle scienze vegetali: la genetica vegetale, la biochimica, la biologia cellulare, la biologia molecolare, la fisiologia e l'ecologia. Negli ultimi anni, la collana ha affrontato anche argomenti quali l'organizzazione del genoma degli organismi fotosintetici, vari aspetti fisiologici tra cui lo stress ossidativo e la regolazione stomatica, i batteri azotofissatori, nonché la fisiologia e la genetica delle specie coltivate. ABR costituisce una risorsa fondamentale per ricercatori e professionisti alla ricerca di approfondimenti autorevoli in campi delle scienze vegetali in rapida evoluzione.

The **Advances in Botanical Research (ABR)** series, which includes the former *Advances in Plant Pathology*, was launched in 1963. The series brings together contributions devoted to the plant sciences: plant genetics, biochemistry, cell biology, molecular biology, physiology and ecology. In recent years, the series has also covered topics such as the organisation of the genome in photosynthetic organisms, various physiological aspects including oxidative stress and stomatal regulation, nitrogen-fixing bacteria, as well as the physiology and genetics of crop species. ABR is an essential resource for researchers and professionals seeking authoritative insights into rapidly evolving fields of plant sciences
